

# Employee Management Database System Manual

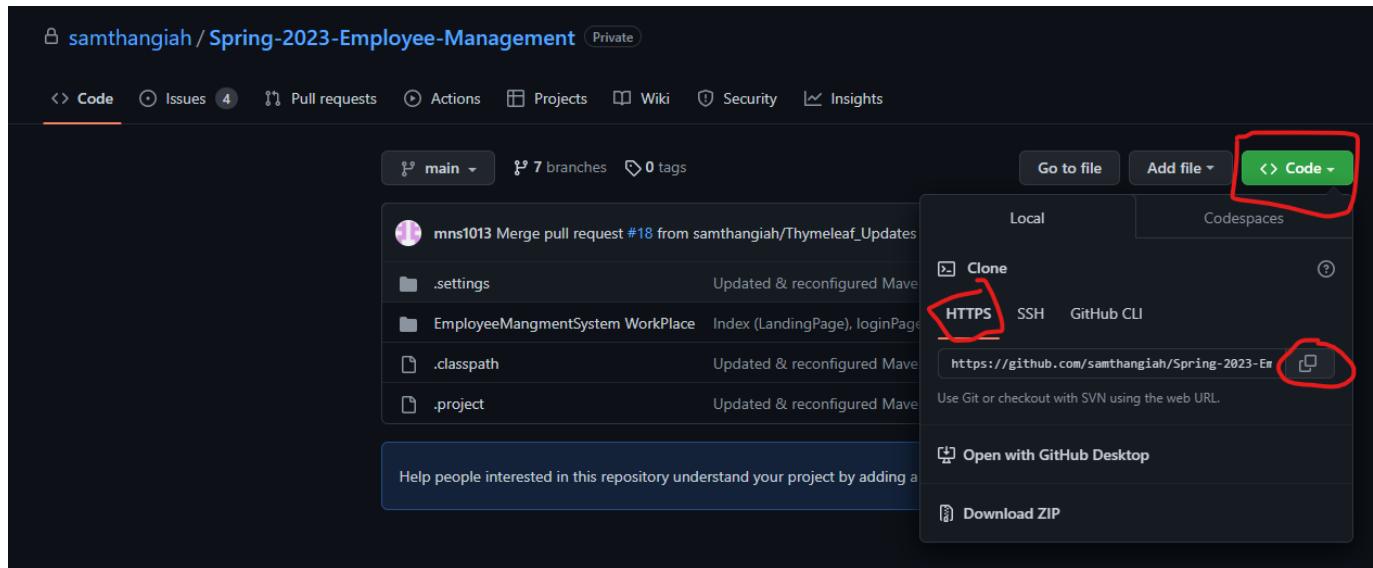

Update: 2.19.2023

Steps to download and open our Project:

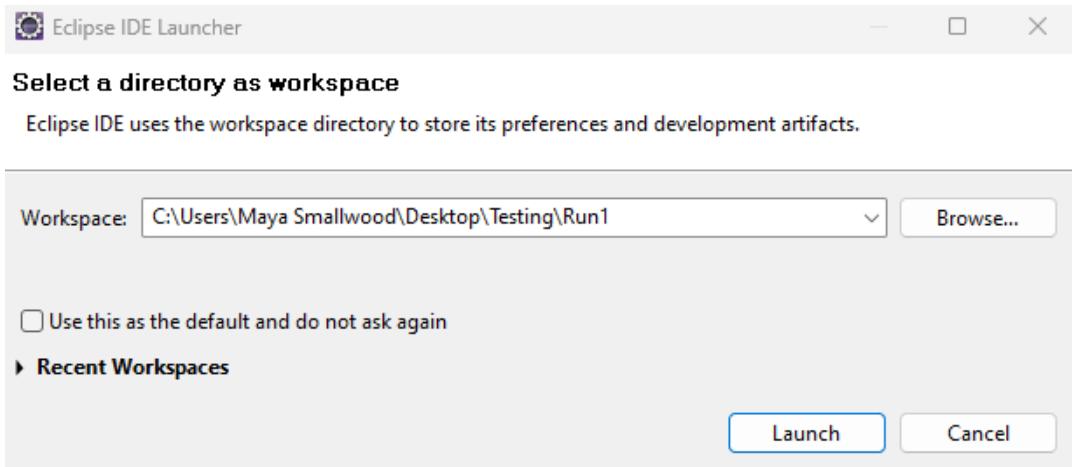

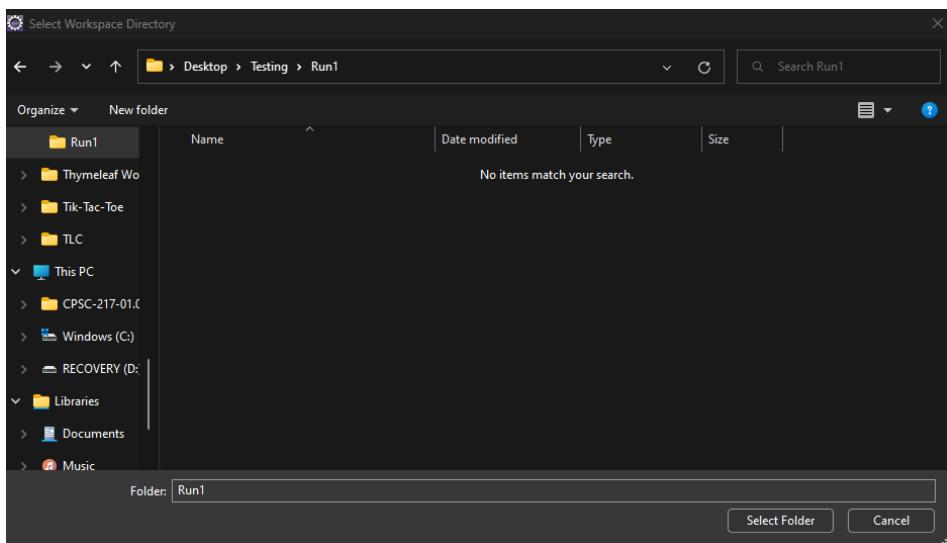

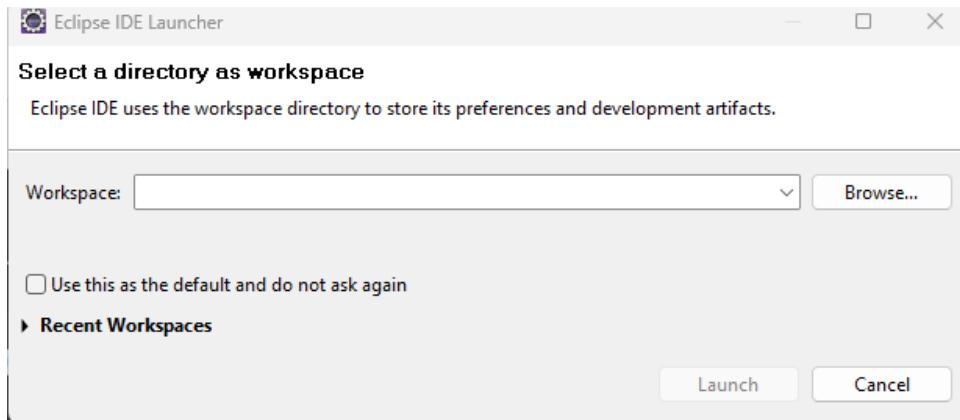

1. First login in and connect to our GitHub repository website

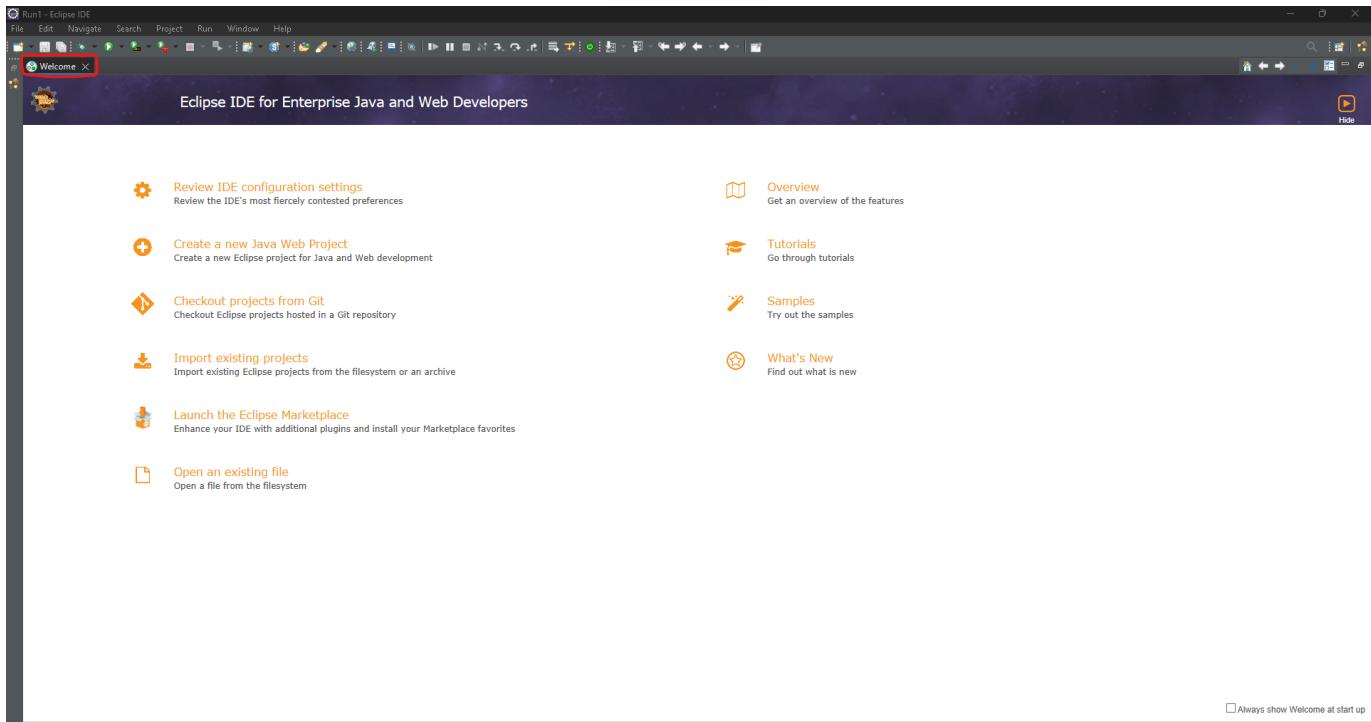

2. Next select Code and Select HTTPS, and then copy

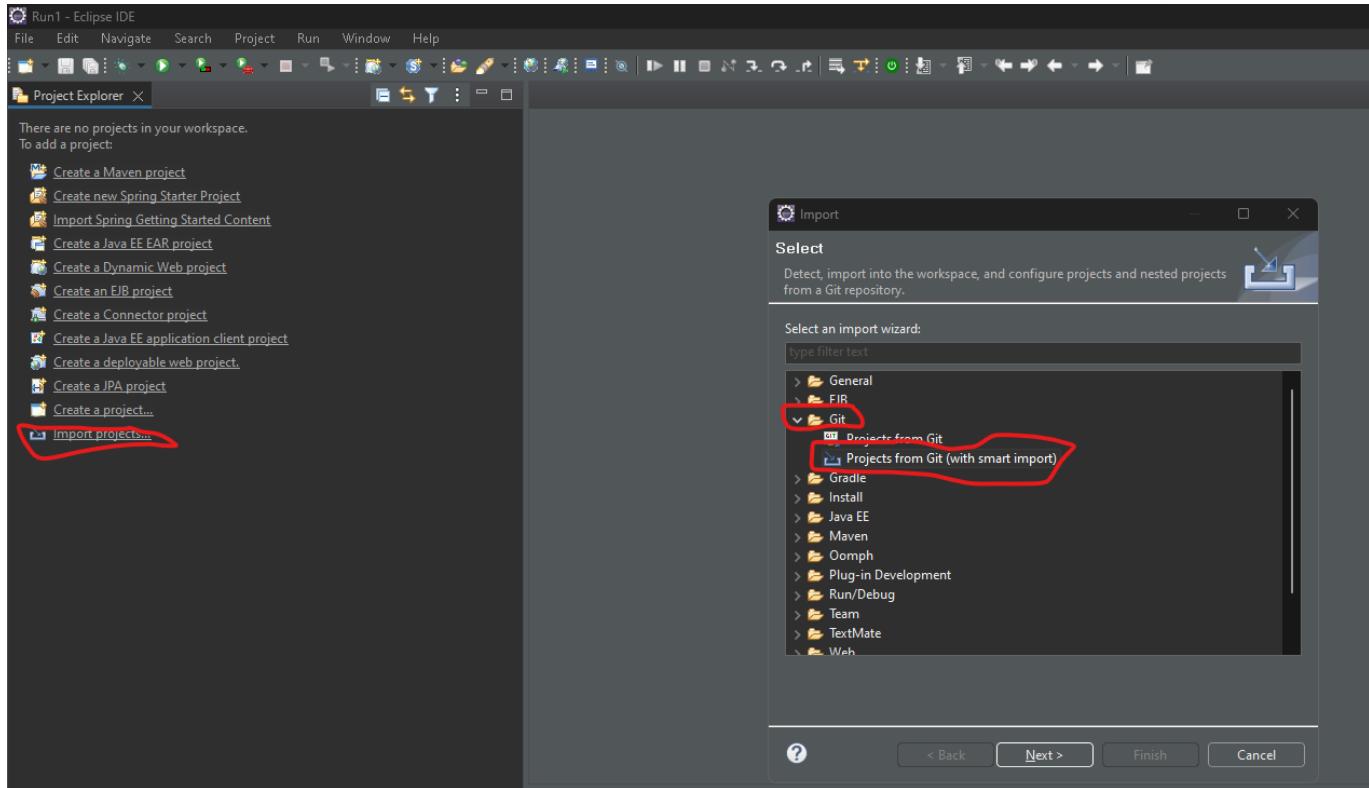

3. Next Open Eclipse IDE Enterprise Java & Web Developers-2022-12 create/select an empty folder

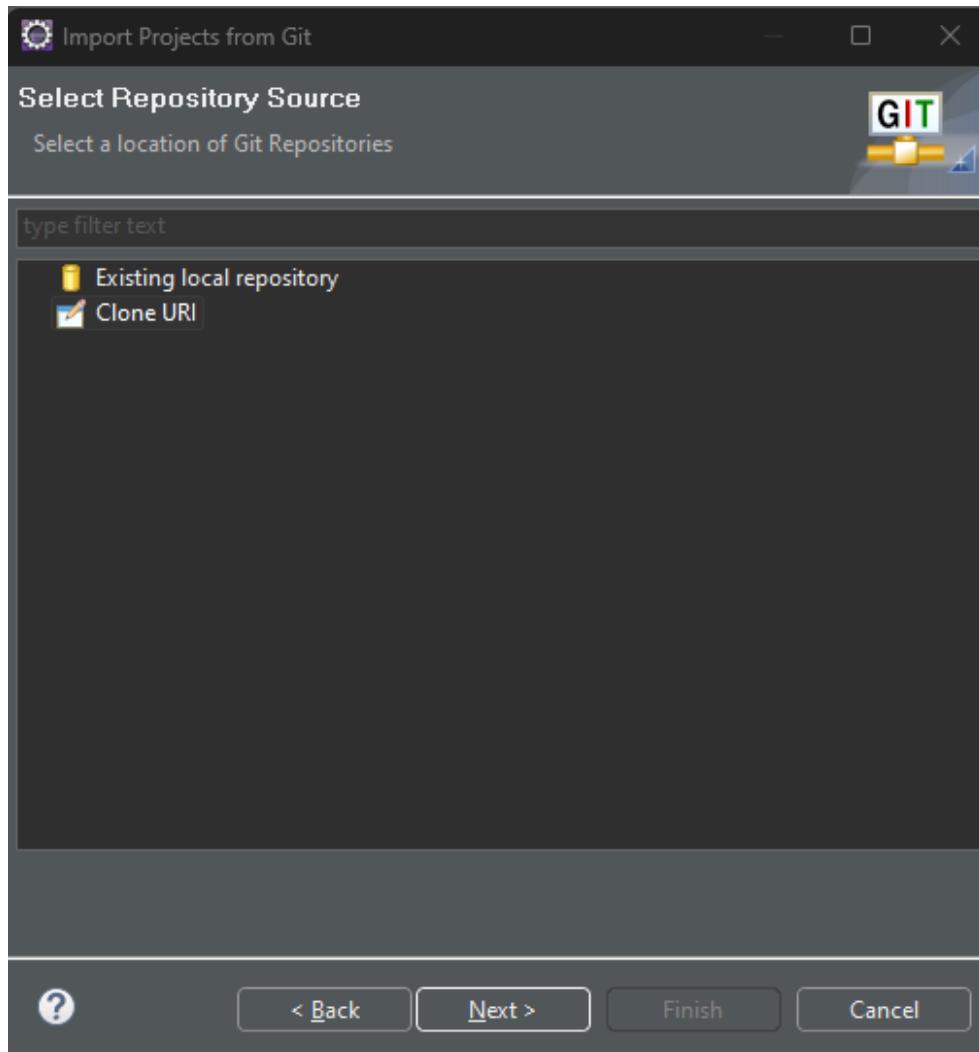

#### 4. Next close the Welcome Window

#### 5. Next select import project and then Git, Projects from Git (with smart import)

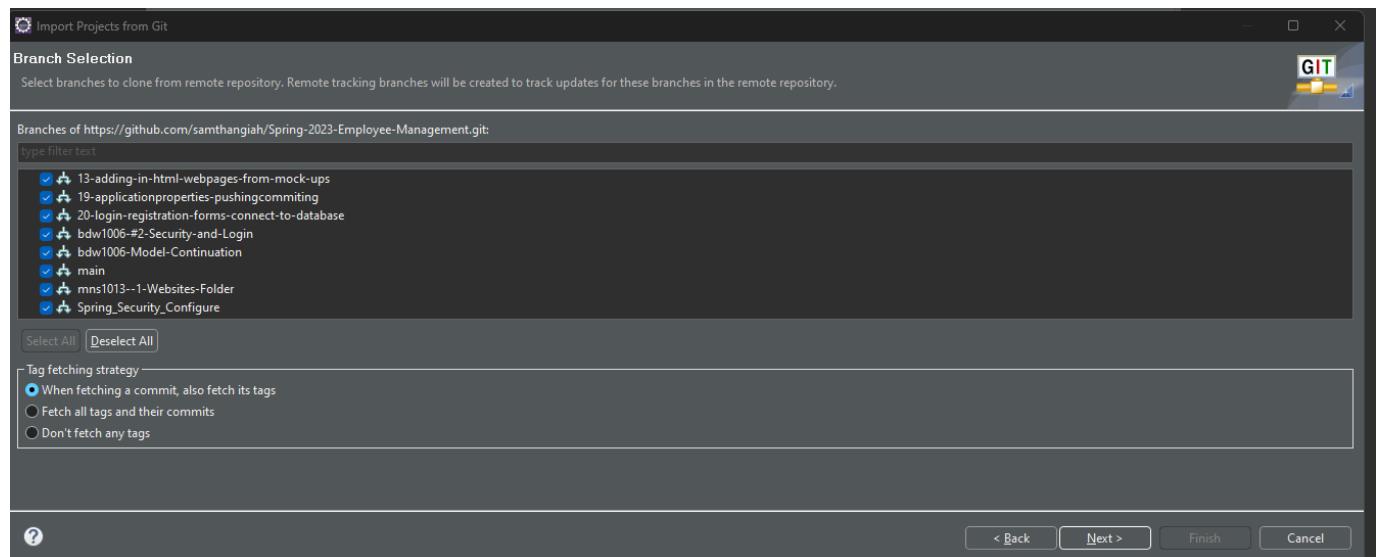

## 6. Clone URL

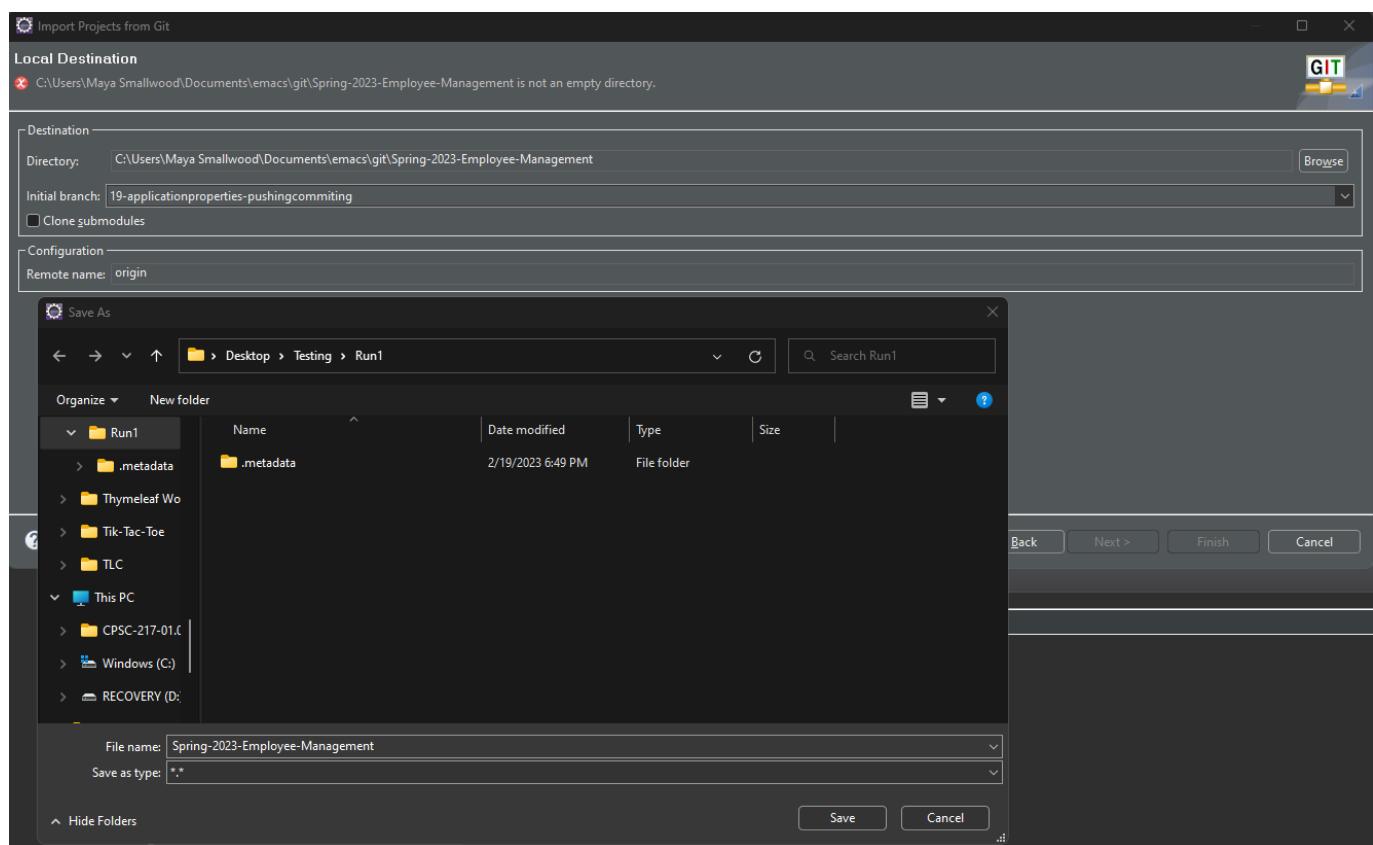

7. Copy that URL from **step 2** and select Next >

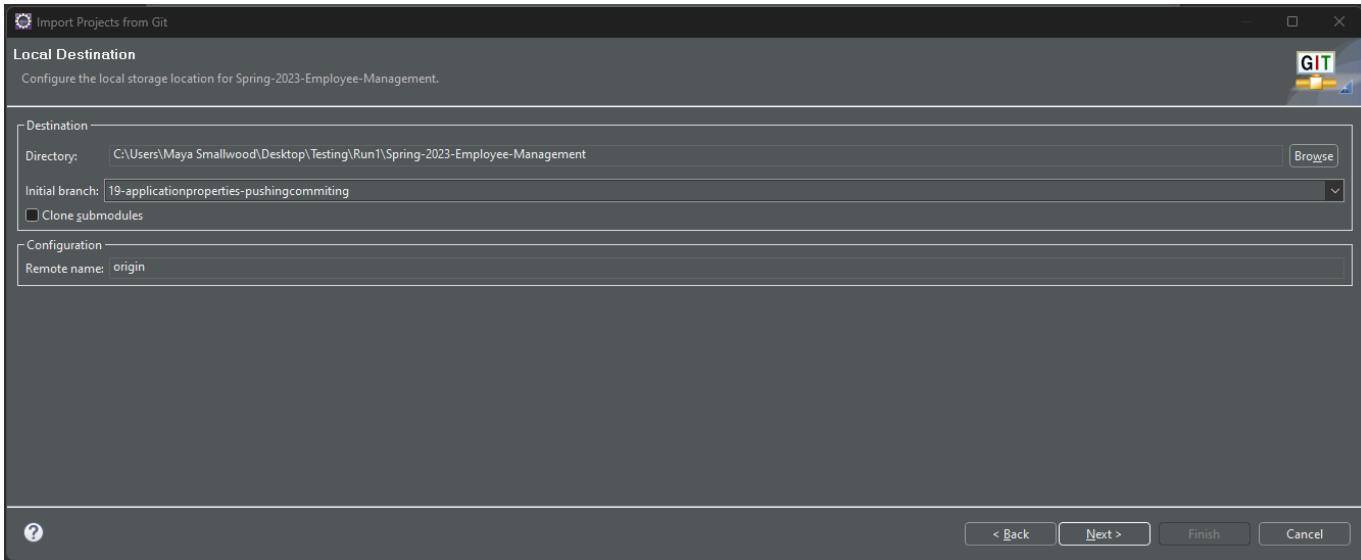

## 8. Select Next >

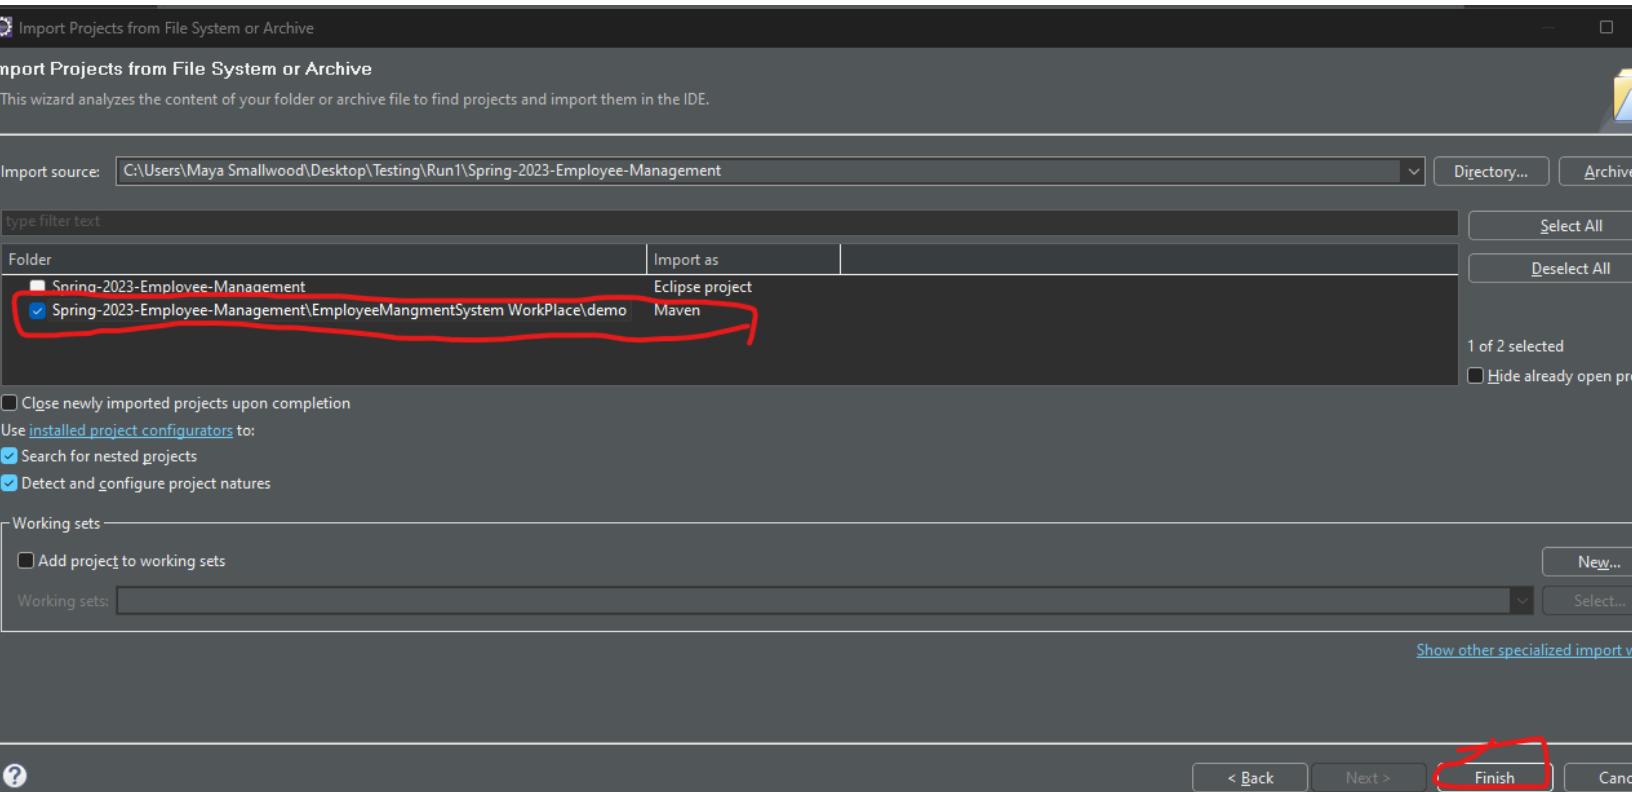

## 9. Select Browser and then save

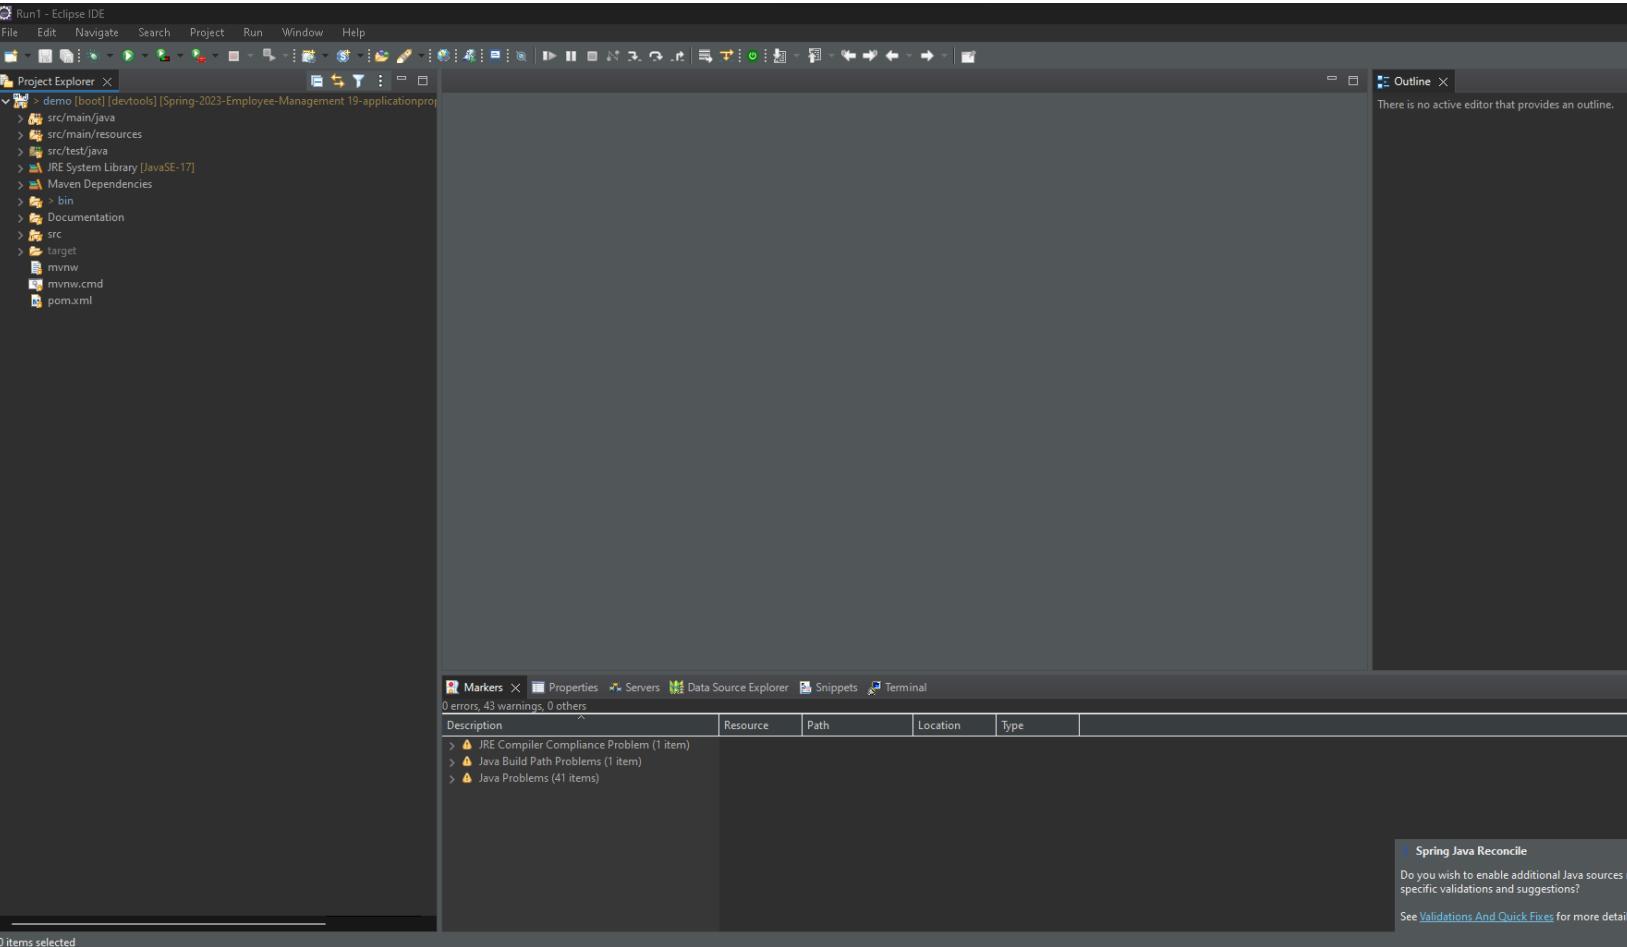

## 10. Select Next

11. ONLY Select "Spring-2023-Employee-Managment\EmployeeMangmentSystem WorkPlace\demo --- Import as Maven and then select Finish

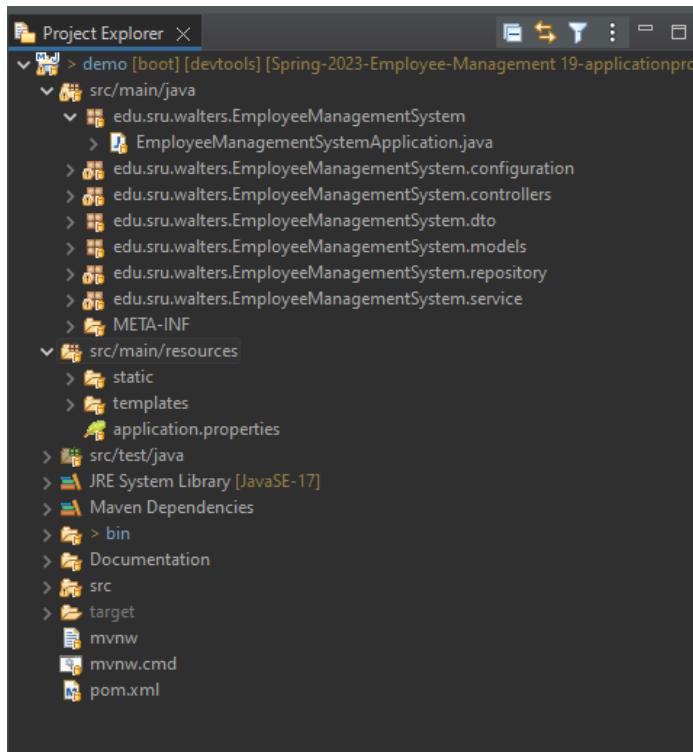

## 12. Project will build itself in and you will see it on the left-hand side

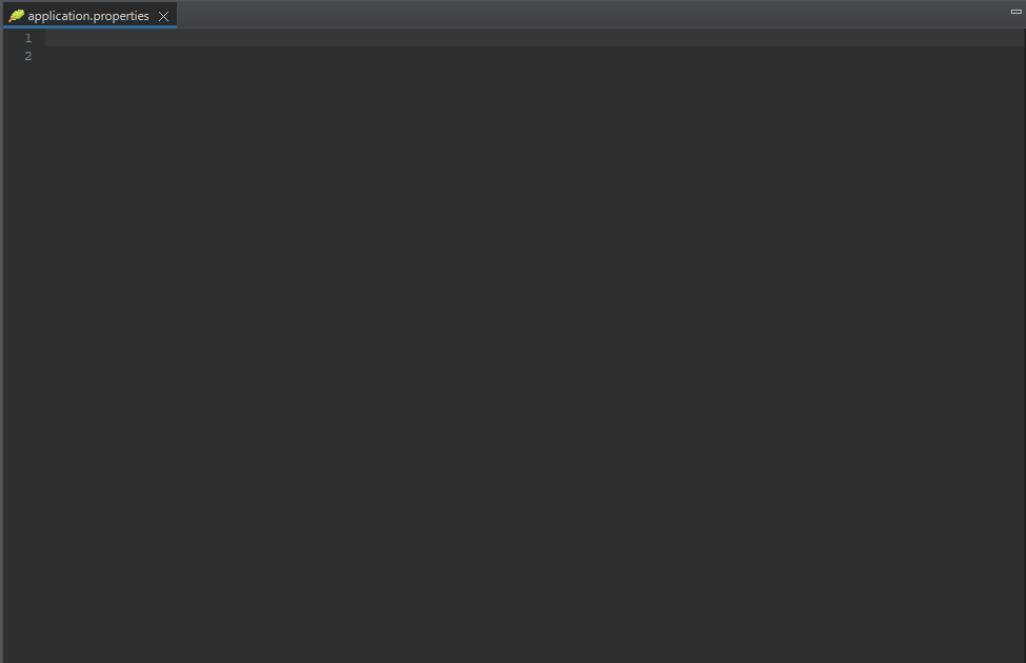

## 13. At the moment, 2.19.23 Our application.properties which creates the database does not sync, therefore please do the following:

Select the dropdown for src/main/resources

## Double click application.properties

The screenshot shows a code editor window with a dark theme. The title bar reads "application.properties X". The main area of the editor is empty, except for the numbers "1" and "2" which are aligned vertically on the left side, likely representing line numbers.

And paste in the following:

```
spring.jpa.hibernate.ddl-auto=create  
spring.datasource.url=jdbc:mysql://localhost:3306/demo?createDatabaseIfNotExist=true  
spring.datasource.username=root  
spring.datasource.password=2023CPSC!!  
spring.jpa.properties.hibernate.format_sql=true  
spring.main.allow-bean-definition-overriding=true
```

```
spring.thymeleaf.cache=false  
spring.thymeleaf.prefix=classpath:templates/  
  
spring.datasource.username=  
&  
spring.datasource.password=
```

Will be your local MySQL Database

#### 14. Final to run our project:

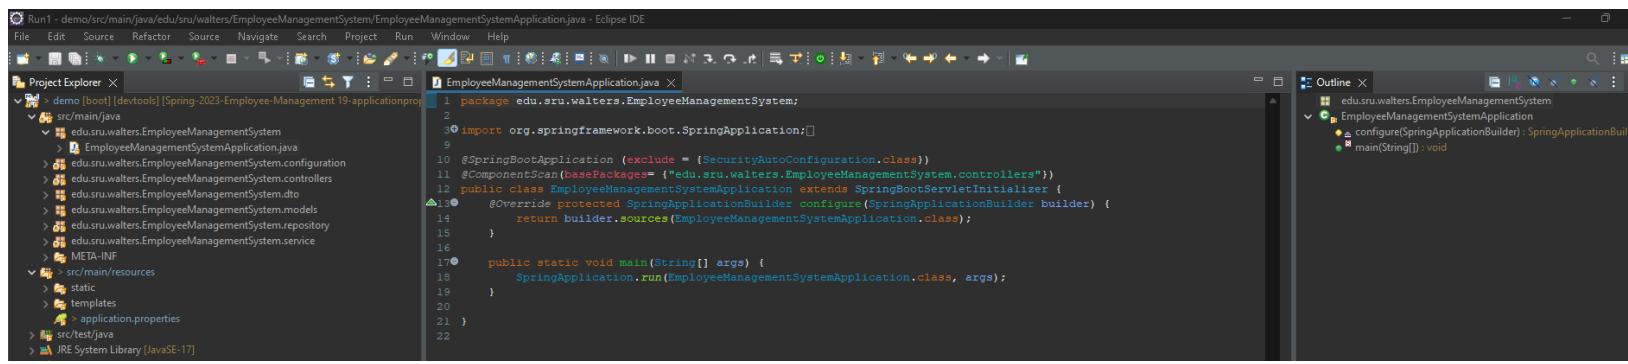

select the following:

sru/main/java

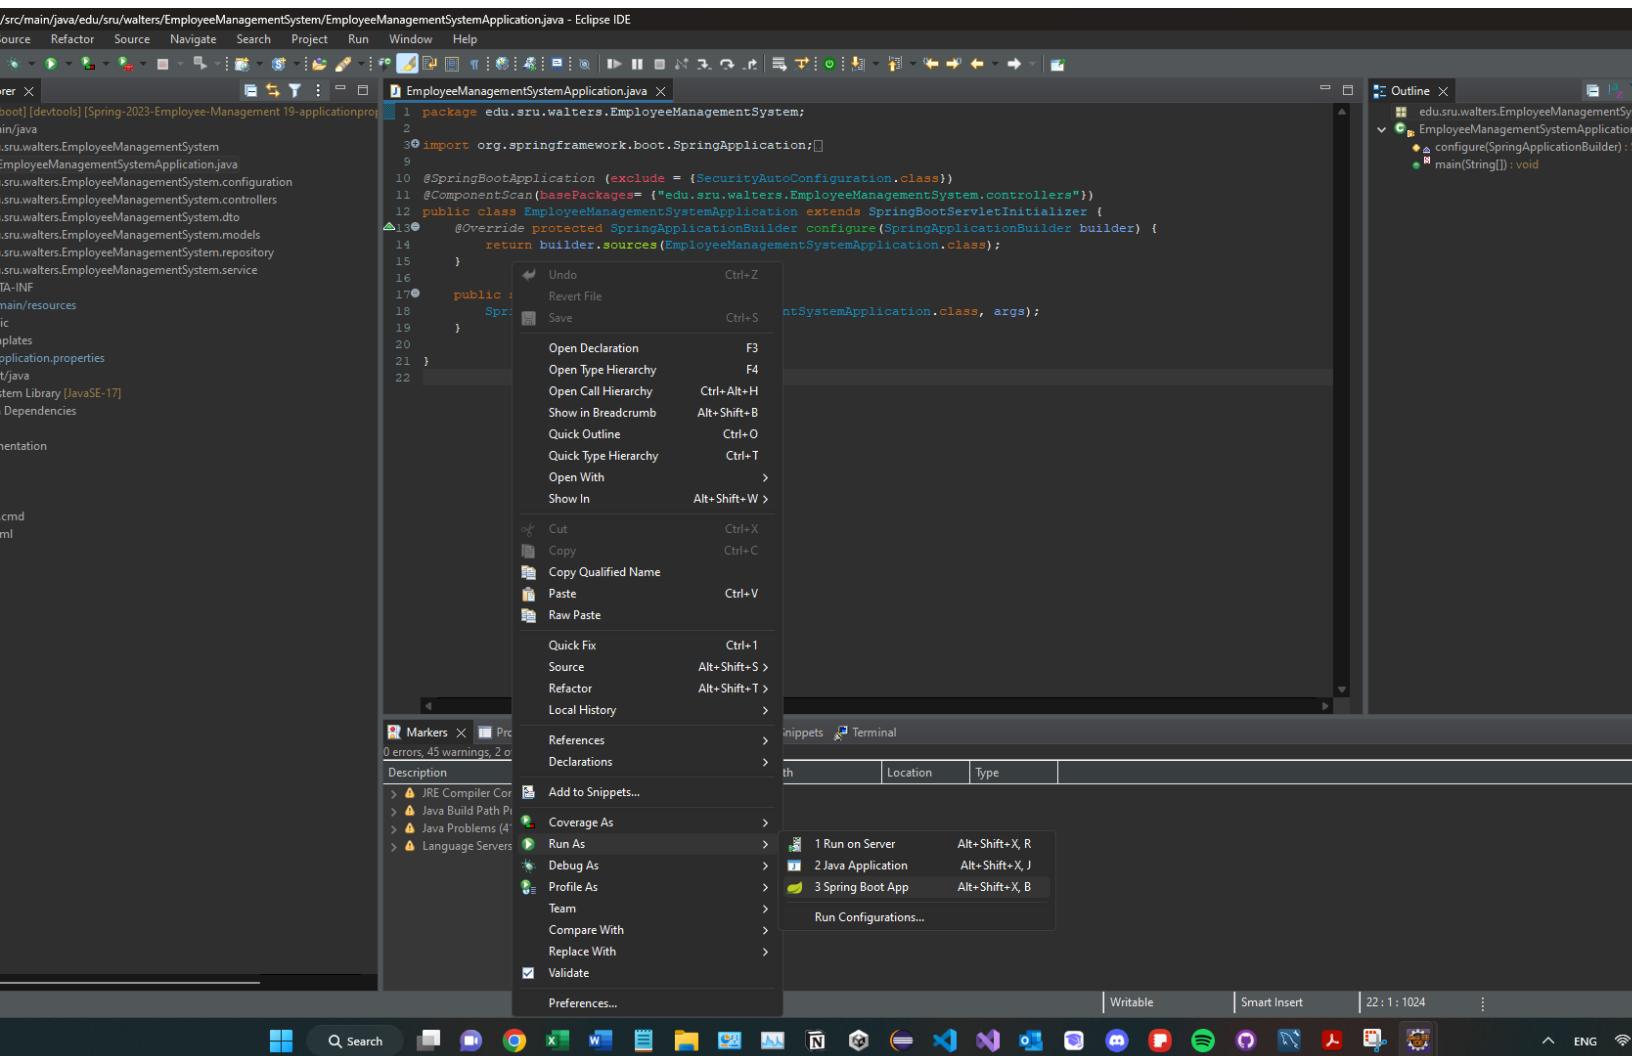

edu.sru.walters.EmployeeManagementSystem

and double click

## EmployeeManagementSystemApplication.java

15. Next right-click anywhere inside EmployeeManagementSystemApplication.java folder  
Go down to Run As  
and then  
Spring Boot App-Will only appear if you have installed spring tools

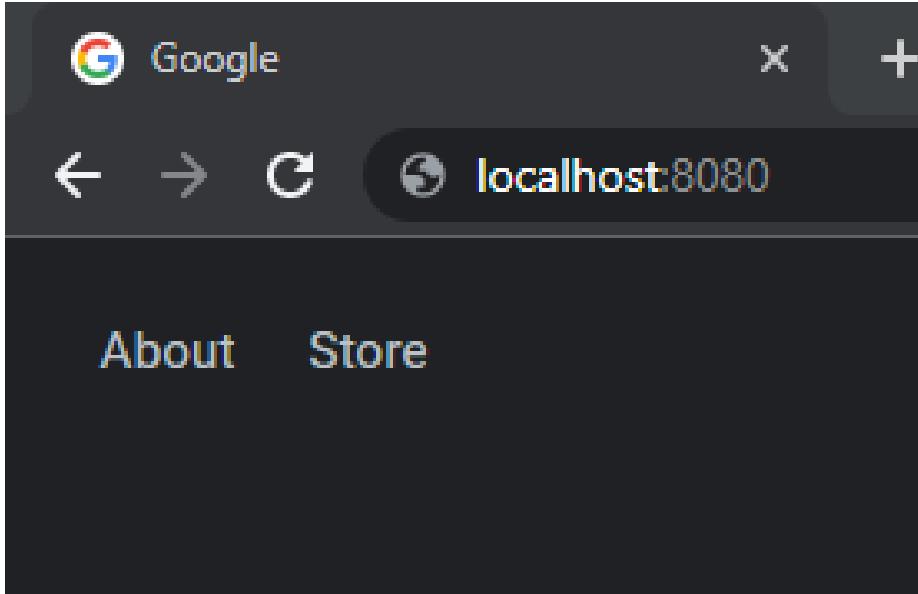

## 16. SpringBoot will run

\*Please Note, if there are any runtime errors you may have to close and reopen the project. Sometimes the project doesn't build all the import files at the time of importing.\*

```
